PROFILE

Associate Engineer at Nagarro with experience supporting cloud environments, workflow automation, and application monitoring. Strong foundation in AWS services (S3, EC2, IAM, CloudWatch), DevOps practices (Jenkins, Docker), and Java Full Stack development. Seeking to leverage skills in CI/CD pipeline automation, infrastructure deployment, and cloud monitoring as a Cloud / DevOps Engineer.

PROFESSIONAL EXPERIENCE

Associate Engineer

11/2025 – Present Gurugram, India

Nagarro

- Monitored cloud infrastructure and application health across AWS and ServiceNow platforms, ensuring high system availability and minimal downtime.
- Integrated ServiceNow ITSM modules with AWS CloudWatch to automate incident creation for server CPU spikes, memory limits, and service failures.
- Created and maintained workflows using Flow Designer to automate business processes.
- Developed and consumed REST APIs for integration with external systems.
- Participated in issue analysis, defect fixing and enhancement activities.
- Performed testing and deployment activities for developed features.
- Assisted senior engineers in reviewing CloudFormation templates and basic deployment scripts for non-production environments.

TECHNICAL SKILLS

- **Technologies:** AWS, Jenkins, Python, Java
- **Cloud:** AWS (EC2, S3, IAM, CloudWatch), CloudFormation
- **Frontend Development:** HTML, CSS, Angular
- **Backend Development:** Spring Core, Spring Boot, Hibernate
- **Database:** MySQL, Postgres
- **Tools & Technologies:** Maven, Git, GitHub
- **Infra Automation:** CloudFormation
- **Scripting:** Shell Scripting.

PROJECTS

Automated CI/CD Pipeline & AWS Cloud Deployment (Key DevOps Project) 📄

Technologies: AWS (EC2, S3, IAM), Jenkins, Docker, CloudFormation, Git

- Containerized application components using Docker and hosted artifacts securely in an AWS S3 bucket.
- Provisioned and configured AWS EC2 instances (Amazon Linux / Ubuntu) with customized AMI images, key pairs, and proper instance types based on workload requirements.
- Configured a basic end-to-end CI/CD pipeline in Jenkins to automate the build, test, and deployment process for a Java web application.
- Created and managed IAM Users, Groups, and Roles adhering to the Principle of Least Privilege.
- Provisioned baseline AWS infrastructure (EC2 instances, Security Groups, IAM Roles) using CloudFormation templates.
- Set up AWS CloudWatch alarms and log streams to track container health, application logs, and resource usage.
- Reduced manual deployment steps by automating the container build-and-push workflow using GitHub triggers.

MyCart – E-Commerce Web Application 📄

Technologies: Java, JSP, Servlets, Hibernate, JDBC, MySQL, HTML, CSS, JavaScript, Bootstrap

- Developed a full-stack Java-based e-commerce web application using JSP, Servlets, Hibernate, and MySQL.
- Implemented user registration, login/logout, session management, product browsing, category filtering, and product details.
- Developed shopping cart functionality including add, remove, quantity update, and total price calculation.
- Implemented checkout and order placement with shipping details and order management.
- Designed a layered architecture using Servlets, DAO, Hibernate ORM, and MySQL for efficient database operations.
- Implemented separate Admin and User roles with product, category, inventory, and user management features.

EDUCATION

Bachelor of Technology

ABES Engineering College, Ghaziabad, U.P., India

08/2021 – 06/2025

Intermediate

Arya Kanya Inter College U.P., India

04/2020 – 03/2021

DECLARATION

I hereby declare that the information furnished above is true to the best of my knowledge.
